FRAME

The single cover has a Galvanised Angle Iron Frame and has grouting lugs to optimise its hold in the concrete. The Modular Covers have a Galvanised Angle Iron Frame and has a T Bar to aid in the removal of the cover and also has grouting lugs to optimise its hold in the concrete.

COVER

It is rectangular in shape , it guarantees a good stability thanks to the height of the border and insertion depth not less than 50 mm, it comes with 2 dead holes, which allows the insertion of a suitable Keys to lift the cover (supplied on request) and then slid out. All the covers are interchangeable. The upper surface is non-skid and has been designed to allow the complete flow of water and avoid the formation of ice. The cover is **locked M16 Cap Screw Bolt** as standard.

INTENDED USE

It is designed for pedestrian walkways and similar areas, parking areas for all types of road vehicles including multi-stored car parks (see norm EN 124 group 2). Product is 3rd party certified, and a copy is available on request.

TREATMENT

The manhole cover has a protective coating of black paint and the Frame is galvanised after manufacture.
