MH-D-TET48-101-400S *	1140 x 1110mm	1000 x 1000mm	80mm	N/A	BTI

FRAME

It is obtained from a single cast, its stability is guaranteed through a double throat supporting area, creating a metal to metal coupling thanks to the interposition of an EPDM gasket, this is studied to obtain a watertight sealing. Correct installation is required to Obtain Watertight Seal.

COVER

It is square in shape, it ensures a high stability due to the depth of insertion over 50 mm, the EPDM gasket inserted in the throat, which is located in the supporting area, and the locking system with Zinc screws. A Special High Security Locking system can be fitted if requested. The opening process is obtained through the insertion of specific handles in the blind holes of the surface. The Cover is non-rock due to the design of the seating and the cover being locked with four bolts to the frame. All the covers are interchangeable.

INTENDED USE

It is designed for all type of Public Road, parking areas and footpaths for all types of road vehicles. Conforms to EN 124 D400 and the product is 3rd party certified by BTI. (Copy available on request).

TREATMENT

This manhole cover presents a standard black protective coating.
